We hereby submit the interim report on our investigations on the Barack Obama birth certificate issue. Our team concludes that a birth certificate in the name of Barack Hussein Obama may have been issued in respect of Barack Obama between the fourth week of August and mid October 1961. But to confirm this would require a further thorough joint investigation as explained below.

We have conducted several investigations by different officers in our team but each of these investigations has never been conclusive. Of course we felt that there are some areas that call for further investigations by the CID because it appears some powerful forces as it were are hell bent in defeating this investigation thus hindering our ability to conclude this case.

Hence, we should organize a fresh new investigation by a joint team comprising of officers from NSIS and CID. There have been previous precedents where both the NSIS and the CID have conducted joint investigations in high profile cases. A case in point is the Julie Ward murder case in the 1990s.

In the report of our officer who conducted this particular investigation, he claimed that the birth certificate was issued sometime in October 20, 1961, but he does not indicate why it took almost two and half months to issue.
